Photoshop keyboard shortcuts are not as fully developed as you might think, and what's in the lesson plan are going to be on-line anyway. For someone that has never used Lightroom before, it does a great job. Edits obviously on a Display are faster than on a Monitor. But I've been using other work management software (Syncro Soft) for about 15 years and it's very intuitive. Very good app, very fast. My only problem is with the Apple Pencil. It comes only in a sample package. I have not been able to get it to work properly with the app. That is why I can only give it three stars.—Myles Bernett

In California This is the worst lightroom I've ever seen. I worked with the new update and I'll never use it again. This is by far the worst update since the switch to CC. I only use it for printing but none of the buttons work when trying to print even though the list of my photos is there on the screen. I can't even print. The Print screen is blank. I was on a Powerwall machine before I did update and I found I could not print on this machine either. I'm done with lightroom. Wait for the new update. I'm ready for an OS update. As one of my friends said the OS update had made him check his computer for a virus.
